Course Title (in English)	Research Practice Seminar “Energy Systems and Technologies”
Course Title (in Russian)	Научно-практический семинар «Энергетические системы и технологии»
Lead Instructor	Gryazina, Elena

1. Annotation

Course Description

This seminar explores cutting-edge research trends in modern energy systems and technologies. Students work in teams to investigate specific research topics such as renewable generation, storage integration, smart grids, electrification of transport, hydrogen systems, and energy efficiency solutions. The seminar emphasizes independent research, teamwork, and academic presentation skills.

Guest lectures of scholars and industry representatives will also happen.

Аннотация

На этом семинаре рассматриваются передовые тенденции исследований в области современных энергетических систем и технологий. Студенты работают в командах над изучением конкретных тем, таких как возобновляемая генерация энергии, интеграция систем хранения энергии, интеллектуальные сети, электрификация транспорта, водородные системы и решения в области энергоэффективности. Семинар уделяет особое внимание развитию навыков самостоятельного исследования, командной работы и академических презентаций.

Также будут гостевые лекции профильных ученых и представителей индустрии.

Energy Consumption	The final session will examine end-use energy patterns, demand-side management, and energy efficiency measures. It will highlight strategies for sustainable consumption, smart metering, and the impact of electrification and digitalization on consumer behavior.	0	10	0	14
Guest lecture	The precise content depends on the invited speaker's background.	9	0	0	0

4. Learning Outcomes

Please specify course intended learning outcomes using
Skoltech Learning Outcomes Framework
.

1. FUNDAMENTAL KNOWLEDGE

1.2. KNOWLEDGE OF APPLIED SCIENCE AND ENGINEERING SCIENCE INCLUDING CONTEMPORARY METHODS AND TOOLS

2. PERSONAL AND GENERAL PROFESSIONAL SKILLS AND ATTRIBUTES:

2.1. COGNITION AND MODES OF REASONING

2.1.2. System thinking

2.1.5. Critical thinking and meta-cognition

2.2. ATTITUDES AND LEARNING PROCESS

2.2.5. Self-awareness and a commitment to self-improvement, lifelong learning and educating

2.3. ETHICS, EQUITY AND OTHER RESPONSIBILITIES

2.3.1. Ethical action, integrity and courage

3. INTERPERSONAL SKILLS

3.1. COMMUNICATIONS IN INTERNATIONAL ENVIRONMENTS

3.1.3. Oral presentation and discussion

3.2. TEAMWORK AND LEADERSHIP

3.2.1. Forming effective teams

3.3. COLLABORATION AND CHANGE

3.3.5. Bringing about intentional change

4. LEADING THE INNOVATION PROCESS

4.1. MAKING SENSE OF GLOBAL SOCIETAL ENVIRONMENTAL AND BUSINESS CONTEXT

4.1.1. Appreciating the potential and limitations of science and technology, their role in society and society's role in their evolution

4.1.3. Understanding the technical products, systems and infrastructure of the sector

4.1.4. Understanding the enterprise — culture, stakeholders, strategy and goals

4.3. VISIONING — CONCEIVING AND DESIGNING SUSTAINABLE SYSTEMS

4.3.1. Identifying stakeholders need and wants

4.3.2. Identifying and formulating objectives and goals

5. Assignments and Grading

In-person Attendance Requirement 80

In-person Attendance Requirement Comment

The attendance is critically important since we polish the art of academic discussion.

Assignment Type	Assignment Summary	% of Final Course Grade
Class participation	Students should be active during each class .	40
Presentation	Presentation in Term 2. Development of selected topic. Team presentation at the end of the Term.	20
Presentation	Presentation in Term 3. Development of selected topic. Team presentation at the end of the Term.	20
Presentation	Presentation in Term 4. Development of selected topic. Team presentation at the end of the Term.	20

6. Assessment Criteria

Select Assignment 1 Type Presentation

Input Sample of Assignment 1 or Share a Link to Assignment 1

Hydro Power and Nuclear Energy

Assessment Criteria for Assignment 1

Student presentations will be assessed based on several clear criteria: the content and critical analysis of the chosen topic, including depth of understanding and ability to synthesize ideas; the logical structure and organization of the presentation, ensuring a clear flow from introduction to conclusion; the clarity and delivery of speech, with appropriate pacing, tone, and minimal reliance on notes; and the use of visual aids, which should effectively support the spoken content. Additional emphasis will be placed on engagement and interaction, including the ability to respond thoughtfully to questions and manage time effectively. Class participation will be evaluated through active involvement in discussions, quality of questions and comments, responsiveness and interaction with peers, and professional conduct that contributes to a respectful and collaborative seminar environment.

Select Assignment 2 Type Class participation

Assessment Criteria for Assignment 2

Students are active during each class. Students asking and answering questions .

7. Textbooks and Internet Resources

You can request at most two required textbooks. Additionaly, you can suggest up to nine recommended textbooks.

Required Textbooks	ISBN-13 (or ISBN-10)

Course Title (in English)	Industrial Immersion
Course Title (in Russian)	Производственная практика
Lead Instructor	-

1. Annotation

Course Description

The goal of Industrial Immersion program is to provide for Skoltech students real hands-on work experience in an industrial sector and develop the knowledge and skills for making an impact through engineering and innovation. The Industrial immersion is performed in a sector company and it implies that internships at academic institutions (like universities etc.) are excluded. Duration of program is 8 weeks. Project focuses on short-term development, manufacturing or operations challenges rather than long-term research problems and is co-supervised by company and Skoltech. The internship is cooperatively planned: project assignment is provided by a company and subject for approval of Industrial Immersion Program Coordinator (I.I.P.C.).

Аннотация

Цель программы "Индустриальное погружения" — предоставить студентам Сколтеха опыт практический работы в промышленном секторе, развить навыки и знания для их будущего применения в областях инженерии и инноваций. Индустриальное погружение осуществляется в отраслевой компании и исключает практику в академических учреждениях (например, университетах и т. д.). Продолжительность программы 8 недель. В отличие от долгосрочных исследовательских задач проект практики представляет собой выполнение краткосрочной технологической задачи в сфере разработки, производства или эксплуатации под руководством кураторов от компании и Сколтеха. Подготовка проекта практики планируется Институтом и компанией совместно: задание на проект предоставляется компанией и подлежит утверждению координатором программы индустриального погружения

5. Assignments and Grading

In-person Attendance Requirement	320

Assignment Type	Assignment Summary	% of Final Course Grade
Project	Students work in companies over a period of eight weeks during summer term. The project work is performed under close guidance of a company project supervisor and Skoltech project supervisor. Following the end of the industrial immersion students should fill in the on-line report form and submit it via Canvas on the final day of the immersion. The report is approved by company project supervisor and Skoltech project supervisor.	70
Poster	Together with individual report students should also submit individual/team project posters via Canvas. A poster comprises the following sections: 1)Project title; 2)Background of the Project Task; 3)Objectives; 4)Process; 5)Results; 6)Conclusions. Poster template is provided and should be used as mandatory to ensure a better visibility of all posters exhibited at the Industry Day.	20
Other	All students should attend Skoltech Industry Day, exhibit their posters at a poster session and answer questions. The poster should be provisionally approved by company project supervisor and Skoltech project supervisor.	10

6. Assessment Criteria

Select Assignment 1 Type Project

Input Sample of Assignment 1 or Share a Link to Assignment 1

More details are provided in LMS - Canvas.

Or Upload Sample of Assignment 1

Assessment Criteria for Assignment 1

The project is fully completed as per the task set by the company, the expected results are achieved. The report is submitted by a student in Canvas on time. The report is approved by company project leader and Skoltech Supervisor as Pass/Fail.
The report consists of three sections:
1. Describe what you have accomplished (be specific) and the progress made toward the objective/goal
2. Describe any significant problems you faced and solutions found. If a project took a different course and your tasks/goals changed (from initially planned), describe why
3. Summarize the outcomes of the project for the company (how the results can be used/implemented).
Criteria for the PASS assessment:
1. realization of project diligently and in accordance with company's requirements;
2. results meet the planned objective considering the industrial environment and constraints.

Select Assignment 2 Type

Other

Input Sample of Assignment 2 or Share a Link to Assignment 2

Poster. More details are provided in LMS - Canvas.

Or Upload Sample of Assignment 2

Assessment Criteria for Assignment 2

Poster is created against the template and submitted via Canvas. The poster is approved by Company project leader and Skoltech Supervisor. Quality check includes 1.complience of the presented information with the actual work peformed; 2. Structuring of information and formatting of text as per the template - text is clear and to the point; 3. Effective use of graphics, color and fonts; 4.Content is in accordance with the structure of the poster template.

Select Assignment 3 Type

Other

Input Sample of Assignment 3 or Share a Link to Assignment 3

Participation in Industry Day

Assessment Criteria for Assignment 3

Students attend Skoltech Industry Day, exhibit posters at a poster session and answer questions about the project implementation and results.

7. Textbooks and Internet Resources

You can request at most two required textbooks. Additionaly, you can suggest up to nine recommended textbooks.

Required Textbooks	ISBN-13 (or ISBN-10)

Provided by a host company

9. Additional Notes

Free Style Comments (if any)

- Short list of companies and projects is prepared by Skoltech and offered to students;
- Proposal for internship project with a curtain company can arrive directly from a student but the project needs to be approved by Skoltech;
- Best industrial immersion project is selected by each Program and awarded at the Conference Skoltech Industry Day:

Overall criteria:

- Industrial component is clearly presented
- Industrial application of the project findings is apparent
- Positive/exceptional feedback of the host company
- Results clearly met or exceeded the planned objectives

Poster:

- Context section provides appropriate perspective/background for the subject
- Objectives are clearly stated
- Process described is accurate and transparent.
- Objectives are met/addressed
- Clarity of presentation. Referencing tables, graphs etc. are well arranged

Course Syllabus

Course Title	Early Research Project
Course Title (in Russian)	Научно-исследовательская работа. Учебная практика
Lead Instructor	-

1. Annotation

Course Description

"Early Research Project" is one of the mandatory educational elements during the preparation of the Thesis by MSc students.
"Early Research Project" is one or several scientific projects carried out by an MSc student under the guidance of academic stuff during Term 3 and 4 of the first academic year. It's a preparatory stage in the process of writing a Thesis.
This element is preceded by the preliminary assignment of a supervisor and the selection of a preliminary research topic in the field of the student's professional activity.
The purpose of "Early Research Project" is:

- to define the topic of the Thesis;
- to set the problems of the proposed research;
- to familiarize yourself with the requirements of the supervisor;
- to determine the student's role in the proposed research.

Course Description (in Russian)

"Научно-исследовательская работа. Учебная практика" - один из обязательных учебных элементов в процессе подготовки выпускной квалификационной работы (ВКР) студентами магистратуры.
Это один или несколько научных проектов, выполняемых студентом под руководством научно-педагогического работника (НПР), в течение 3 и 4 учебных модулей первого учебного года, которые являются подготовительным этапом к написанию выпускной квалификационной работы (ВКР).
Этому элементу предшествует предварительное закрепление научного руководителя и выбор предварительной темы исследования в области профессиональной деятельности студента.
Целью элемента "Научно-исследовательская работа. Учебная практика" является:

- определение темы будущего проекта магистерской диссертации;
- определение проблематики предполагаемого исследования;
- знакомство с требованиями научного руководителя;
- определение роли студента в предполагаемом исследовании.

Skoltech Learning Outcomes are indicated as per Skoltech Learning Outcomes Framework.

1. FUNDAMENTAL KNOWLEDGE

1.1. KNOWLEDGE OF MATHEMATICS AND NATURAL SCIENCES

1.2. KNOWLEDGE OF APPLIED SCIENCE AND ENGINEERING SCIENCE INCLUDING CONTEMPORARY METHODS AND TOOLS

2.1. COGNITION AND MODES OF REASONING

2.1.1. Analytical reasoning and problem solving

2.1.2. System thinking

2.2. ATTITUDES AND LEARNING PROCESS

2.2.3. Responsibility, intensity, perseverance, urgency and will to deliver

2.2.5. Self-awareness and a commitment to self-improvement, lifelong learning and educating

2.3. ETHICS, EQUITY AND OTHER RESPONSIBILITIES

2.3.1. Ethical action, integrity and courage

2.3.5. Proactive vision and intention in life

2.3.6. Commitment to social and professional behavior

3.1. COMMUNICATIONS IN INTERNATIONAL ENVIRONMENTS

3.1.4. Inquiry, listening and dialogue

3.1.5. Communications in English in scientific, business and social settings

4.1. MAKING SENSE OF GLOBAL SOCIETAL ENVIRONMENTAL AND BUSINESS CONTEXT

4.1.3. Understanding the technical products, systems and infrastructure of the sector

4.2. VISIONING — INVENTING NEW TECHNOLOGIES THROUGH RESEARCH

4.2.1. The research process — hypothesis, evidence and defense

4.3. VISIONING — CONCEIVING AND DESIGNING SUSTAINABLE SYSTEMS

4.3.2. Identifying and formulating objectives and goals

4.3.5. Understanding the technical context and ecosystem of the product or service

5. Assignments and Grading

Physical Attendance Requirement (% of classes)	100

Assignment Type	Assignment Summary	% of Final Course Grade
Report	"Early Research Project" is resulted in a report on the completed work, which includes a description of: • project; • project goals; • alignment of the student's personal professional goals with the project content; • student's role; • achieved results; • problems encountered during the work on the project and ways of their overcoming; • general conclusions; • description of the reporting format which is provided by the student to the supervisor.	100

6. Assessment Criteria

Assignment 1 Type

Report

Sample of Assignment 1

Report is completed and submitted.

Report includes:
1) Student's name
2) Supervisor's name and his/her affiliation
3) Project title in Russian and in English
4) Description of the project
5) Alignment of the student's personal professional goals with the project content
6) Results achieved
7) Problems encountered during the work on the project and ways of their overcoming;
8) General conclusions;
9) Description of the reporting format which is provided by the student to the supervisor.

Assessment Criteria for Assignment 1

1. The general project goal and aims are clear and well defined.
2. The problems encountered during the work (organizational, research-related, etc.) are identified, and appropriate solutions are proposed.
3. All results are described and discussed correctly.
4. Conclusions reflect the goal and aims of the project.
5. The scientific report materials provided to the supervisor are submitted in LMS (Canvas) full and complete.

7. Textbooks and Internet Resources

You can request at most two required textbooks. Additionaly, you can suggest up to nine recommended textbooks.

Required Textbooks	ISBN-13 (or ISBN-10)
-

Lead Instructor	-

1. Annotation

Course Description

Thesis Research Project - is one of the compulsory educational elements for second-year MSc students while preparing their Thesis. As per curriculum plan Thesis Research Project is completed by the students during the second year of studies.
The aim of this educational element is to prepare a scientific project (Thesis), which is a program requirement.
The results of Thesis Research Project are demonstrated by the students on a consistent and regular basis when some parts of work are ready.
Apart from the regular reports sent by the students to their supervisors, the results of this educational element are: Thesis Title (in Russian and English), Status Report, MSc Thesis Draft, MSc Thesis Manuscript.

Аннотация

«Научно-исследовательская работа. Преддипломная практика» – один из обязательных учебных элементов в процессе подготовки выпускной квалификационной работы (ВКР) студентами второго года магистратуры. «Научно-исследовательская работа. Преддипломная практика.» выполняется студентами в течение второго года обучения.
Целью элемента «Научно-исследовательская работа. Преддипломная практика.» является подготовка научного проекта студента, необходимого для выполнения требований образовательной программы и написания магистерской диссертации. Результаты освоения преддипломной практики демонстрируются студентом последовательно на регулярной основе по мере выполнения отдельных частей исследовательской работы. Результатами помимо регулярных отчетов, предоставляемых студентом научному руководителю, являются: утверждение темы диссертации на русском и английском языках, первый проект текста ВКР (Status Report), проект текста ВКР (MSc Thesis Draft) и финальный текст ВКР (MSc Thesis Manuscript).
